

Reach and SVHC Statement July 2024

Dear Customer

The REACH regulation EC 1907/2006 came into force in June 2007 and the SVHC list is constantly updated (27th June 2024) and published by the European Chemicals Agency (ECHA). For your information the most up to date list is available at:
<https://echa.europa.eu>.

According to the REACH regulation we are a “downstream” user for all substances and articles we are using. Therefore we rely on our suppliers for the registration of all REACH compliance required raw materials supplied, which we have received.

We can further confirm that we are not intentionally using or adding any of the substances that REACH classify as Substances of Very High Concern (SVHC).

We can confirm the raw materials from our suppliers do not contain any of these substances more than the permitted limits and are free from halogenated propellants, HBCD and contain less than 0.1% lead or tin.

Niko Coatings Limited can assure you that we are continuously communicating with our suppliers to ensure fulfilment of the REACH regulation.

Please do not hesitate to contact us should you require any further information

Yours sincerely

Ian Pearson
